Clematis Paniculata. Sweet Scented, Hardy Japanese Clematis.

From a Photograph.

Conceded by all to be the most phenomenal plant of the age. Surpassing in beauty and usefulness the world famous Japanese plants Crimson Rambler Rose, Hydrangea Paniculata Grandiflora and Japan Snowball. While the most rampant growing, the most profuse and continuous bloomer, it is withal the most artistic and esthetic plant in our gardens. Porches, walks, terraces, arbors, trellises, etc., are soon covered with its dense deep green foliage and smothered with its fleecy snow-white flowers of delightful fragrance. The plant is remarkably fresh and clean, free from blight and insect pests.

Crimson Clematis, Madame Edouard Andre.

This fine Clematis was first exhibited at the World's Fair, Chicago. It attracted the attention of the trade, owing to the brilliancy of its flowers, which are of the most vivid crimson, extremely large in size, and produced in the greatest abundance, even on plants of smallest size. It is a rapid grower, hardy, prolific and continuous bloomer.

THE FAMOUS CHINESE KUDZU. "JACK AND THE BEANSTALK VINE."

(*Pueraria Thunbergiana.*)

**WATCH IT
GROW!!**

"It is a veritable Jack and the Beanstalk Vine."—
A. H. OLMSTED, Esq., in *Meehan's Monthly*.

"There is possibly nothing like it in the whole vegetable kingdom. It is extremely valuable for rapidly covering anything in one season, and interesting to the lover of the wonderful. It has grown on our grounds 70 feet in one season."—MR. THOMAS MEEHAN.

If you wish a vine that will grow anywhere, in the best or poorest soil, then plant the Chinese Kudzu. It will flourish where nothing else will grow, and will last for twenty-five years or more.

The large, bold leaves of the brightest green afford a dense shade. The clusters of purple *Wistaria-like flowers*, 6 to 7 inches long, are *deliciously fragrant*, but its greatest feature is its wonderfully strong growth (12 inches in a day), which makes it invaluable for rapidly covering arbors, fences, porches, dead or old trees, rockeries, etc. As such it was recommended by "Garden and Forest," "American Gardening," "Meehan's Monthly," and other reliable journals, as well as by such eminent authorities as Mr. Watson, of the Royal Kew Gardens; Mr. Olmsted, of World's Fair fame, and Mr. Thomas Meehan, in whose garden it has been growing since 1876! In the Hakone Mountains, much visited by tourists, the Kudzu fills the air with fragrance. The vine is, of course, very hardy, grows to a height of 50 feet, if permitted, and is well filled with dense foliage close to the ground, but may be kept down by cutting back.

PACKET, 15 SEEDS, 10c.

Soak the seed in warm water for 6 hours before planting. Start inside in pots or boxes, and transplant outside, where it is wanted to grow, when the plants are 3 or 4 inches high, if the weather is suitable. The enormous growths mentioned by these various authorities of course refer to established plants, and not to seeds the first year, although the second year they make enormous growths.

Good plants 25c. 3 for 60c.

Extra strong plants 40c. 3 for \$1.00.

DOLICHOS JAPONICUS.

"Sticklers for the right must kindly excuse me heading these notes with the name given instead of the correct one, *Pueraria Thunbergiana*; but old names hang to us and it seems like giving the cut to an old friend to give this plant a new designation.

"This vine has been given much notice of late on account of its enormous annual growth. Shoots of fifty feet in a season are not at all uncommon. It is such a rapid grower that it must have lots of room; and for this reason common porches and similar structures are unsuited for it. What it wants is a pergola, or something on which it can entwine itself to reach the top of a tall building or tree; it wants no enticement to make

Kudzu Vine growing on house.

more growth than any other vine in cultivation known in our nurseries of to-day.

"The foliage of this vine is not unlike that of the Lima bean, but it belongs to the family of wistarias, and, like those vines, has racemes of flowers six to eight inches in length; the blossoms are rose colored and fragrant. But instead of the racemes drooping, as they do in wistaria, they are erect. The plant, when in bloom, continues to flower for about six weeks. When grown to something overhead, such as a pergola, the flowers are free to the vision, but when growing to a tree, or similar object, the growth is so rapid as to overlap the blooms, and one sometimes does not know the vine is flowering till admonished to look for the flowers by the odor when passing, or those that have fallen. It is a most useful vine because of its rapid growth, and one which may be considered quite hardy; as, no matter if its shoots are hurt by cold, it springs up and grows like magic as soon as the season opens."

New Achimenes. All of a sudden these have become exceedingly popular and no wonder. The grand photos published in several journals prove plainly what wonderful specimens they form in a few months from a few small plants started in pots or baskets. The shades of colors are innumerable in their combinations, and the markings and spottings bewildering. Really they are so grand and so easy to grow that we recommend them late in fall, when done blooming, you will find lots of little bulbets. Keep these in sand or soil over winter to start again in early spring. The colors comprise white, blue, scarlet, sky-blue and spotted. **Mixed varieties, all colors,**

Begonia Duke Zeppelin.

This is undoubtedly the most gorgeous summer flowering tuberous plant (Begonia) ever produced, and elicits exclamations of delight from every one who has the good fortune to see a mass of plants blooming out of doors from May until October. The waxy, glowing scarlet flowers, as double as Camellias, completely hide the foliage from view, so that, at a distance, only a solid mass of bloom can be seen. It stands the sun better than any Begonia, and cannot fail to become a standard bedding plant, and blooms also well in winter. Strong bulbs,

25c. each; 5 for \$1.00.

Begonia. Grandiflora Erecta Cristata.

(Bearded Begonia.) The remarkable feature is that on each petal a miniature forest has grown, composed of curiously twisted threads, forming near the center of the flower a dense crest or beard, giving the flower a very gay and puzzling aspect. Very ornamental and highly interesting. Prices of Bulbs, 25c. each; 5 for \$1.00.

THE FAMOUS ORCHID-FLOWERED CANNAS.

A fabulous price has heretofore been asked for these varieties, which has whetted the appetite of connoisseurs. They were sent out for the first time in the spring of 1896, at \$5.00 each. They have proved on trial to be fully as good as was claimed. The flowers are of immense size. The cut on this page shows the actual size of the flowers, and conveys an idea of their immense size better than any description. All of these varieties are magnificent. The high price asked for them prevented their being purchased by many; but now that we can offer them at a low price, they should be in the hands of every one who is desirous of obtaining the largest and finest varieties.

AUSTRIA is a bright golden-yellow, with the faintest possible scarlet markings on one of the petals—so faint that it is safe to call it a perfectly pure yellow—the slight markings of scarlet being invisible at a distance. Good roots, 10 cents each, 3 for 25 cents, \$6.00 per 100.

ITALIA is a much deeper golden-yellow, the centre of each petal being marked with scarlet. The cut shows the distribution of the different colors. Good roots, 15 cents each, 2 for 25 cents, \$8.00 per 100.

HIBERNIA or Green-leaved America—This is a grand new variety of the True Orchid-Flowering type; immense flowers, five to six inches across, borne four or five feet high, in splendid bold spikes. The petals are of good substance and quite durable; the color is a splendid shade of rich orange scarlet, finely flaked and streaked with golden-yellow tints, very showy and handsome. Fine Dormant Roots, 15 cts. each, 2 for 25 cts., postpaid.

One each of these 3 Orchid-Flowered Cannas mailed for 35 cents. A bargain.

Beautiful New Single Dahlia "Twentieth Century."

A grand new single variety, entirely distinct from all previous introductions, and not only valuable as a flowering plant for the garden, but as a choice cut flower, higher prices being paid for it the past season than for the finest Roses.

The plant is of free branching habit, commencing to bloom early in the season, and producing its flowers on stems 3 feet long, and which, after cutting, keep in perfect condition for eight to ten days. They measure $4\frac{1}{2}$ to 6 inches in diameter, and, early in the season, are an intense rosy crimson, tipped with white, and having a white band around the disk. As the season advances they become lighter, until they are almost a pure white, suffused with soft pink, blended in the most beautiful manner.

Roots, 35c. each; 3 for \$1.00.

Seed of Twentieth Century Dahlia.

Packet, 15c.

New French Collarette Dahlias.

THE GREATEST NOVELTY IN TOMATOES EVER OFFERED

SPARKS' EARLIANA THE EARLIEST LARGE TOMATO IN THE WORLD

Most famous of all extreme early Tomatoes. Two weeks ahead of all others—think of it! This Tomato is not

only remarkable for its earliness, but for its very large, uniform size, handsome shape, beautiful red color, and wonderful productiveness, standing unequaled and alone in this respect. Its solidity, fine size and quality are unsurpassed. \$6,000 was cleared by a Norfolk trucker in one year. My seed is from selected stock of Mr. Sparks' choicest, extreme-early, free-fruited strain, as desirable for the kitchen garden and table as for market.

Large Packet, 10c.; ¼ oz., 25c.

*Icicle Radish.***New "Triumph" Radish.**

This extra early Radish is a distinct novelty. The small, round, pure white roots are marked with bright scarlet, in flakes and in short lines running around the circumference. The bright contrasting colors are most attractive; skin thin; flesh crisp, tender and mild. **Per packet, 5c.; oz., 15c.**

Icicle, the Best Early Long White Radish.

Exceedingly tender and fine flavored. Half-long white Radish, resembling the Strassburg in size, but of quicker growth; very smooth and regular in appearance, with pure white skin, and exceedingly delicate and brittle.

Packet, 5c.; oz., 15c.

Radish Scarlet Globe. This is my favorite for table use and general planting, and I make several plantings each year of it in my garden. Very deep scarlet, sharp oval form of medium size, solid, tender, crisp and mild; remains in eating condition longer than any other.

The monstrous fruits are of thick, blocky form and of most brilliant glossy scarlet; 4 to 5 inches broad at the top and of equal length. All are uniformly of most "enormous" size. The flesh is extremely mild, as sweet as an apple, and unusually thick; it makes an excellent salad sliced and served like tomatoes. **Packet, 10c.; ¼ oz., 20c.; ½ oz., 35c.**

We feel assured that any one who wishes a delicious melon for home use will be well satisfied with this sort. **Packet, 5c.; oz., 10c.; 2 oz., 15c.**

*Defender Muskmelon.*

Defender Muskmelon (Ferry). This melon, of our own development, is, in some respects, the best sort yet produced. There is no variety in which the flesh is of fine quality and flavor so near to the rind as in this, and none in which the rind is so thin, hard and firm. We believe that in sweetness it is fully equal to the Rocky Ford or Netted Gem, and it has, in addition, the high flavor peculiar to such orange-colored sorts as Osage, Surprise and Emerald Gem. **Packet, 5c.; oz., 15c.; 2 oz., 25c.**

"PAUL ROSE." New Muskmelon. In the "Paul Rose" we are offering the best Muskmelon introduced for many years. It is a successful cross of the Osage with the Netted Gem, and combines the sweetness of the former with the fine netting of the Gem. No other Melon equals it in smallness of seed cavity, nor approaches it in firmness. **Packet, 5c.; oz., 20c.; lb., \$2.00, by mail.**

Stems long for cutting. *Perfection Asters*, finest mixed, 20 to 30 colors. **Packet, 150 seeds, 5c.; $\frac{1}{8}$ oz., 15c.**

Semple Aster. The flowers are immense—often curiously curved and twisted like a beautiful Japanese Chrysanthemum. The plant grows 2 feet high and needs plenty of room, as it throws up innumerable flower stems. Blooms during August and September, after most Asters are gone, which makes it very valuable for exhibitions and fairs. **Packet, 100 seeds, 5c.; $\frac{1}{8}$ oz., 20c.**

The plants attain a height of 15 to 20 inches and measure 24 to 28 inches at the base. The Christmas Tree Aster comes into bloom medium early, and is so profuse in flowering that plants are often covered with 70 to 100 well developed flowers, of which always one appears at the end of each stem. THE LATEST FLORAL WONDER.

"SHASTA DAISIES."

(*Chrysanthemum Leucanthemum Hybridum.*)

MR. BURBANK, the Wizard of Horticulture, and originator of this plant says:

"During the past few years when 'Shasta Daisies' were being bred and educated up to their present state more admiration has been bestowed upon them by visitors than upon any other flowering plant growing on my grounds, and with good reason, for to-day no other flower can compare in extent of usefulness. Their first qualification is hardiness. They can be grown out of doors by everybody where it is not cold enough to kill oak trees. Second, they are perennial, blooming better and more abundantly each season. Third, they can be multiplied rapidly by simple division and they are not particular as to soil. Fourth, they bloom for several months—in California nearly all the year. Fifth, the flowers are extremely large and graceful—averaging about a foot, often more—in circumference, with three or more rows of petals of the purest glistening whiteness, on single, strong, stiff, wiry stems, nearly two feet in length. This peculiar grace and remarkable whiteness cannot, of course, be shown on paper.

Japanese Imperial or Giant Morning Glory. As the Angel of Morn speeds on the rays of early dawn from east to west, the dewy trumpets of the Morning Glory announce her coming and carpet her way from ocean to ocean.

The flowers of these New Mammoth Morning Glories are as large as moonflowers, often 6 inches across, and the petals of many are beautifully fringed and ruffled. The vines begin to bloom when 2 to 3 feet high and continue to bear flowers by the hundreds until frost. The flowers are not only large but superior in every way to the common kind. The petals are thicker, which gives the colors a deeper and richer look. The flowers are strangely and beautifully marked and colored in a way never seen before. Snowy throats with blood-red border, velvet plum bordered with white, snow-white through all possible shades of blue, and of red from palest pink to darkest reds and purples. They are streaked, mottled, striped, marbled and bordered in a wonderful fashion, and sometimes show rare shadings of ash gray, bronze, brown and slate-blue, colors rarely found in any other flowers. To gain time start the seeds in small pots in the house in March or April, and plant in a warm, sunny place.

These are the two finest varieties ever sold.

New Giant Nasturtium "Jupiter."

The King of Nasturtiums.

A New Giant Flowered Climbing Nasturtium, originated by Mrs. Theodosia B. Shepherd. "As beautiful as an Orchid," has been remarked of this magnificent flower, the precursor of a new race of Giant Nasturtiums.

The plants are very strong and vigorous, with large, dark green foliage. The great, rich, pure yellow flowers measure $3\frac{1}{2}$ inches across. The petals are large ($1\frac{1}{2}$ inches in diameter); they overlap, and are exquisitely and deeply crinkled like crepe. The flowers are very fine for cutting, resembling Orchids in their rich beauty. A grand and distinct variety,

"Special Mixture" of Dwarf Nasturtiums.

Dwarf Nasturtiums are most admirably adapted to beds and borders. Their bush-like growth, the abundance of their flowers in their endless variety of colors, their long season of bloom—from June until late in the fall—and the little care that they require, make them really the "busy man's flower." My Special Mixture of Dwarf Nasturtiums will give a larger variety of colors in even proportions than any other Nasturtium Mixture, for it is put up by myself from named sorts, and also contains a large share of the new Liliput Nasturtium and of the "Dwarf Chameleon," which is in the Dwarf Collection what Madame Gunther is in the Tall—the richest and most varied combination of colors ever produced, showing odd colors hitherto unknown among flowers.

Price per large packet, 10c.; oz., 15c.; 2 oz., 25c.; $\frac{1}{4}$ lb., 45c.; lb., \$1.50.

For general list of Nasturtiums see page 41

You can plant Nasturtiums in so many different ways—Tubs, Baskets, Pots and Beds.

New Dwarf Nasturtium "CHAMELEON."

This is the most unique and beautiful variety of Nasturtium ever raised. One plant produces as many differently colored flowers as a dozen plants of the ordinary kinds. Nearly every flower on a plant is different; they are large and very beautiful. This is one of the best and most charming novelties we have had in years. I import my seed of this Nasturtium from France, and from the firm who originated the plant.

Packet, 5c.; oz., 15c.; ¼ lb., 50c.

New Hybrid Nasturtium "LADY GUNTHER." (Trailing or Climbing.)

This is the Giant-flowered Nasturtium. The flowers are larger than any others, the colors are much brighter and richer, more varied in shades and more beautiful in every way.

For richness and variety of colors these new hybrids have no equals among Nasturtiums. There are shades of rose, salmon, brightest red, pale yellow, either as self colors or spotted and striped. The foliage is mostly dark and contrasts very effectively with the rich colors. They are climbers and free and continuous bloomers.

Packet, 5c.; oz., 15c.; ¼ lb., 50c.

New Giant and Fancy Nasturtiums.

You can't plant Nasturtiums wrong, they are appropriate and cheery anywhere—in beds, borders, vases and tubs, window boxes and veranda boxes, or in the house, summer or winter. What a show these bright and dazzling beauties make! They are like a carpet of emerald and gold. One plant will brighten a home and gladden your heart. Some say Sweet Peas—I say Nasturtiums give more for the care and the money than any plant. Plant liberally.

NEW TUFTED PANSIES.

For years these hardy, tufted Pansies have been grown in England, where they are most extensively used. The plants grow in dense, compact little bushes, which are completely covered with their bright flowers from early Spring until late in the Fall. The colors range in all shades, of white, pink, blue, yellow, violet and purple, as self colors or in combinations. It is a decorative plant of the highest order, and we feel sure it will soon be as universally grown in this country as it has been for years in England. Pkt. (100 seeds), **10c.**; 3 Pkts. for **25c.**

Giant Paris Pansy.

PANSIES.

The old **Heartsease** is hardly recognizable in the greatly improved **New Strains of Pansies.**

GIANT BUGNOT.

Its flowers are of enormous size and the most circular form; the petals are of great substance and velvety appearance, each one bearing a large, deeply colored blotch that runs out in delicate veins to the edge; the shading comprises tints of red, bronze and brown not found in any other mixture. Pkt., **15c.**

GIANT TRIMARDEAU PANSY.

These remarkably large **French Pansies** for size of flower and robust growth eclipse by all odds any known strain. They get such a start in the Spring that the hot Summer weather seems to have no effect on them, even when other Pansies have almost dwindled away. Mixed colors in great variety. Pkt., **5c.**

Trimardeau or Giant, Yellow Mixture. Pkt., **5c.**

Trimardeau or Giant, White Mixture. Pkt., **5c.**

German Pansies in fine mixture. Pkt., **5c.**

MIXTURE OF SCARLET AND RED PANSIES.

This is a mixture of special selections of Pansies with red and scarlet flowers. It is partly made up of such varieties as Meteor, Red Ridinghood, Cardinal, Fiery Faces and also from some special selections we had made for this mixture by several Pansy specialists. A bed of these Pansies presents a striking and beautiful effect and will please every lover of this favorite flower. Pkt. (100 seeds), **5c.**

GIANT PARIS PANSY MIXTURE.

Thousands of these Pansies are sold daily in the Paris markets. The flowers of this strain are as large as the Trimardeau and far superior in color and substance of petals; blotches are more conspicuous. Having a stout and stiff lower stem, flowers last longer. Pkt., **5c.**

FINEST MIXED PANSY SEED.

This mixture contains a great number of the finest sorts; large, bright and varied. Pkt., **3c.**

MY PANSY DEPARTMENT.

I not only aim to make my list include all standard as well as the best new sorts, but I strive, regardless of price, to import only the best quality of each particular kind, and always give my customers "new crop" seed. My Pansies are second to none offered by any other in this country.

New Giant Pansy. Madame Perret.

A sample flower of one of the 100 different kinds found in this strain of Masterpiece Pansy.

New Giant Pansy. Madame Perret. ❀

(The best and only Pink Pansy.)

This novelty is specially distinguished from other Pansies by the plant being full and spreading, with very broad and extremely dark-green leaves. The straight and stiff stems it possesses cause the flowers to stand out well from the foliage. The color of the blossom ranges through all the shades of red, from a pink to a fine deep purple, with an intermediate bright red edged with white. The face of the flowers in some cases is regular in color, while in others it is lined and striped. The extraordinary size of the flowers, which reach as much as 3 to 3½ inches in diameter, make it a novelty of the first rank. Pkt., 100 seeds, 12c.; 3 for 30c.

New Giant Pansy. President McKinley.

Flowers are of extremely large size and circular form, measuring from 2½ to 3 inches across. The ground color is a deep, rich golden yellow, but each petal is so heavily blotched that the yellow appears only as a wide, well-marked border. The large blotches are so rich and velvety as to appear almost black, but closer examination shows it to be a deep red brown, shaded with violet markings around the small, golden-yellow eye. Pkt., 100 seeds, 10c.

Pansy International Mixture. ❀ ❀ ❀

Beauties culled from every clime. All the finest Pansy gardens of Europe are ransacked, all the Pansy specialists of the world contribute to make this the best and most beautiful assortment of Pansies the world produces. At the Pan-American Exposition they were awarded first prize. They are a Gold Medal brand. Pkt., 100 seeds, 10c.; 3 for 25c.

Normandie. ❀ ❀ ❀ ❀ ❀

These I love best. So many rich colors, such lovely shape. Rich as velvet and bright as poppies. They come from sunny France. 50 kinds and colors. Pkt., 100 seeds, 8c.; 3 for 20c.

Royal Show. ❀ ❀ ❀ ❀

These are lauded without stint by many, and they truly make a royal show. Colors of scarlet, plum and royal purple, blue and bronze, marbled, blotched, and giant striped.

Pkt., 100 seeds, 6c.; 3 for 15c.

Imperial German. ❀ ❀ ❀ ❀

The favorite and most popular Pansies raised in Germany. Colors very bright, faultless form. Highly praised by all.

Pkt., 100 seeds, 5c.; 2 for 8c.; ½ oz., 25c.

Mammoth Butterfly. ❀ ❀ ❀ ❀

The flowers are very large. In coloring they are varied, seldom two alike in 100 plants. They are mottled and spotted, streaked, tigered and splashed, while the colors are mainly those rich wine-reds, chocolate, velvety red brown, lavender, violet and purple shades.

Pkt., 100 seeds, 5c.; ½ oz., 25c.

Masterpiece Pansy. ❀ ❀ ❀ ❀

This strain comes nearer to "Double Pansies" than anything ever introduced under that name. In reality the number of petals is the same as that in other Pansy flowers, but they are crimped and curled in such a fashion that the flowers appear double. The flowers are of enormous size, often 3 inches across, and the color variations and combinations are odd and striking.

Pkt., 10c., 3 for 25c.

BIRD OF PARADISE. (*Poinciana Gillessi*.)

The flowers of this rare plant are of a rich golden yellow, measure two and one-half inches across, and are produced in very large trusses. The most attractive part of the flower is the large pistils, which are spread out in fan-like form, and are of a beautiful, bright crimson color. The foliage is highly decorative, similar to a very delicate Acacia. If the seed is started early, it will produce a profusion of blooms the first year. Pkt. 10c.

PYRETHRUM—LITTLE GEM.

One of the most popular foliage plants we have; for edging a bed or walk they are superb. Foliage fern-like, double golden-yellow flowers. Pkt., 50 seeds, 4c.

DOUBLE PORTULACCA—Mixed.

My seed of these fine double varieties produce flowers like large double Roses. A bed of these are magnificent, thickly studded all summer with double yellow-scarlet rose and crimson flowers. They thrive under the scorching sun and in light sandy soil. Pkt., 300 seeds, 5c.

SINGLE PORTULACCA.

These shower the plants completely over with large, bright, beautiful flowers of the most lovely shades. Pkt., 300 seeds, 3c.

GIANT PHLOX.**Drummondii Grandiflora**

(Large Illustration.)

Flowers nearly twice as large as the ordinary Phlox Drummondii, while the colors are richer and brighter. For beds or borders of dazzling beauty nothing equals the Phlox. Sown outside, they bloom very soon after planting and until frost. My **Giant Phlox Mixture** contains more than **40 kinds** and **colors** of the best and most improved sorts. Lavender, scarlet, violet, white star, and fringed.

Pkt., 150 seeds, **5c.**; $\frac{1}{8}$ oz. of this mixture, **12c.**

GIANT HYDRANGEA FLOWERED PHLOX.

These are undoubtedly one of the handsomest species of the Phlox family. They are more floriferous than the others, the flowers are large of good substance and in handsome colors and are borne in large umbels, just like a **Hydrangea**, hence their name. **Mixed Colors.**

Pkt., 150 seeds, **6c.**

PHLOX DRUMMONDII.

Many colors mixed. First-class quality.

Pkt., 150 seeds, **3c.**; $\frac{1}{4}$ oz., **12c.**

"STARRED AND FRINGED" PHLOX.

These are very distinct and striking, the petals radiate like the points of a star, in many colors and shades, and the petals are bordered with white; many are fringed and crimped. A very striking class. Pkt., 150 seeds, **5c.**

DOUBLE-FLOWERING PHLOX.

A very desirable class. Flowers are double and semi-double and last much longer than those of the single Phlox. The white is especially valuable as a cut flower. We are sure our customers will be greatly pleased with these and we recommend a trial. Pkt., 100 seeds, **6c.**

DWARF PHLOX.**Phlox Drummondii Nana Compacta.**

These are much superior to the other Phloxes for ribbon bedding or borders. The plants grow very symmetrical in neat little bushes, about 8 inches high, covered with flowers during the whole Summer and Fall, as large as those of the Drummondii and as easy to grow. Pkt., 150 seeds, **6c.**

One Packet Each of the Above 6 Kinds, 25c.

NEW LARGE FLOWERING HARDY PERENNIAL PHLOX PLANTS AND SEEDS.

Chinese Primrose.

The New Giant-Flowering Browallia "VIOLET BLUE."

This has proved a most charming plant, both for the window garden and the flower bed; makes nice bushy little plants, 8 to 10 inches high and blooms all the time. The flowers are large, fully 2 inches across, and lovely deep violet-blue. This is a very favorite color, and it would be hard to find a plant that is easier grown or a more constant and satisfactory bloomer. When Summer is over, take the plants indoors, and they will bloom constantly all Winter. We recommend it as sure to please, both for Summer and Winter bloom. Very sweet and handsome. Plants, 15c. each; 2 for 25c. Seed, packet, 10c.; 3 for 25c.

A great exhibition and decorative plant. This is a mixture of the finest English, French and German strains; the flowers are very large, from 7 to 8 inches in circumference, and in the most brilliant colors. I sell a large quantity to florists.

Packet, 60 seeds, 15c.

Fairy Rose Seed. (Rosa Multiflora nana Perpetua.)

This is the true New Hardy Hybrid Perpetual, Ever-Blooming Rose, which will surely blossom in 60 days. I have a photograph of a plant in flower 28 days from sowing the seed. This variety is entirely new and very expensive, and must not be confounded with seed sold as "Polyantha" or "Multiflora," which simply means "many flowered" and will not bloom under four to six months, and altogether inferior in every way. These roses are a wonderful freak of nature. These sturdy little Midgets start to flower in babyhood two months from seed. They flower on little shoots 3 inches high. With age the flowers increase in size and number, until large trusses of bloom cover the plant from spring until frost, when the flower trusses are closely followed by clusters of bright red hips or seed pods. They are hardy and live from year to year, increasing in beauty and perfection each year. The flowers come double, semi-double, in many colors, white, pink and crimson.

Packet, 3 capsules, 20 seeds, with "Jaadoo" for sowing, 15c.
Packet, Multiflora, or Polyantha Rose Seed, 50 seeds, 3c.

NEW ORIENTAL HYBRID POPPIES.

These new hybrid perennial Poppies grow readily and flower profusely the first year from seed. Are perfectly hardy and bloom more and more each year. They are as large as the Oriental Poppy; flowers often 6 inches across, in marvelous variety and charming shades of color, tender flesh, white and pink to crimsons, scarlets and ox-blood reds.

Purple Feather Grass. ❀ ❀ (*Pennisetum Ruppelianum.*)

An annual which produces plumes by midsummer.

This is undoubtedly one of the most ornamental decorative grasses ever introduced, and will be found as useful for room, hall, or table decoration as many a palm, while having the advantage of rapid and vigorous growth, and being easier to manage.

Its graceful, narrow curving leaves produced by the hundreds in succession, are overtopped by most elegant purple feather plumes a foot long, which by themselves are quite ornamental as vase decorations and can also be used for dry grass bouquets.

Sown as late as March, it makes a bold plant, unlike any other in the garden, always a feature of attraction. If grown in pots, no one could wish for anything more graceful. This novelty has been greatly admired wherever shown. Pkt., 5c.

Kochia Scoparia. ❀ ❀ ❀

This plant is at once unique, ornamental, and very beautiful. The rounded, globe-like forms resemble a delicate evergreen highly colored. The plants branch freely, and the stems are clothed with slender light-green leaves. Early in the fall the ends of the shoots are thickly set with small, bright-scarlet flowers, *the bushy plants resembling balls of fire.* The plants are equally showy planted singly to show the round, ball-like form on all sides or grown in continuous rows or hedges; a very striking plant. Large pkt., 5c.

Ease of culture is the first quality that commends the Salpiglossis to all amateur gardeners. The New Emperor strain is a very great improvement on the older type in its increased size of flowers, their improved shape and larger variety of colors, and, more than all else, in their singularly beautiful veinings of gold. These are the only flowers, to our knowledge, that show a glint of gold in their coloring.

Planted in an ordinary nail keg in May, was in flower all the time till August, when it had 590 clusters of flowers, continued in full flower (removed to a greenhouse in October) to December, when 350 clusters were counted. At this time every young branch was cut off to propagate, but on January 14th it had 100 beautiful new clusters. The plant has a most graceful drooping habit, grows rapidly, and blooms persistently winter and summer, producing a cluster of flowers at each leaf. Color, most delicate, clear, brilliant, rosy lilac; foliage, bright dark green. Does equally well in winter or summer.

What could be more fascinating than one of these little plants, a couple of feet high, decorated with fancy ribbons and covered with dainty little oranges, as a centerpiece for a dinner table? And, when it is known that the fruit is delicious to eat, one's delight is still greater. Easy to bloom and fruit. Nice grafted plants, 30c. each; 2 for 50c.

**Crimson Spirea.**

Is of Japanese origin. When it is scarcely three inches high it begins to bloom, and thereafter is seldom out of flower. As a house plant nothing can equal it. In the garden it will make a plant three feet high and wide, and will be covered with heads, one foot across, of brilliant crimson flowers. Price, **15c. each; 2 for 25c.** Larger Plants, **25c.**

JAPAN SNOWBALL.**(Viburnum Plicatum.)**

I have long wanted to sell this excellent plant, but price and scarcity of good plants have deterred me from so doing until now. The plant stands at the head of hardy shrubs; it is absolutely hardy; a good grower; and is as much superior to the common snowball as a cultivated Rose is better than a wild one. Flowers resemble a huge snow-ball. Will grow six to eight feet. In bloom all Summer. Fine Blooming Plants, **15c. each; 2 for 25c.** Extra Large Strong Plants, **25c.**

THE NEW CRIMSON**SPIREA.****Anthony Waterer.****HYDRANGEA (Paniculata Grandiflora).**

The Giant Flowering Caladium

(Great Novelty)

In general appearance the plant resembles *Caladium Esculentum*, but is entirely distinct, much larger and grander, and vastly superior in every way. Both the plant and leaves are of gigantic size, and attain a large size in a very short time. Under the same conditions it will grow three or four times as fast as the common species. Well grown leaves are four to five feet long and two to three feet wide, and the plants eight to ten feet high. The leaves are of different shape than those of *C. Esculentum*, and instead of being a dull green, the Giant Caladium leaves are of a bright, glossy green, glistening in the sun as if varnished.

Produces Flowers Freely.—Think of it! A flowering Caladium, the plant, the most magnificent of foliage plants, and in addition producing in abundance the greatest of snow white fragrant flowers. Commences to flower when four or five months old, and produces flowers in constant succession. I have had plants to bloom continuously for over a year in the greenhouse. Plants lifted from open ground in the fall will continue to bloom all winter in greenhouse until time for planting out again next spring. The flower buds break out of the leaf stalks near the base, each flowering leaf stalk producing six to twelve buds which open in succession. The flower resembles a giant calla, often 15 inches long and seven to eight inches wide, and remains open three days and nights; the first two days it is of the purest snow white, the third day it changes to a pale yellow. The fragrance of the flower is remarkable, so powerful that a single flower will scent the entire air for rods, and of so spicy and aromatic a fragrance that I know of nothing to compare it to. Its fragrance is exhaled only at night.

As a Pot Plant, winter or summer, the Giant Caladium possesses great merits, especially fine for the decoration of window or conservatory. It is of the easiest culture, enduring adverse conditions well, and the leaves attain a great size even in small pots. Give it rich soil and plenty of water. The plant can be taken up in the fall and wintered in house or cellar, or grown as a flowering pot plant in the house during the winter.
